

STAY VISABLE

WEAR FLUORESCENT ATTIRE

- VESTS
- BRIGHT-COLORED TOPS
- REFLECTIVE STRIPS
- HARD HATS (OPTIONAL)

Troublesome Weather? ...tune in!

Be current with closures, newly determined delays and other announcements: ABC27, GLRA website & GLRA Facebook page

SPACING

MAINTAIN A MINIMUM OF 15 FEET BETWEEN ALL VEHICLES ON THE WORKING-FACE

UNTARPING AREA

The untarping area moved up to the working-face. Once on top of the landfill, only then, may drivers untarp their loads. Too much debris blows out during travel to the active site area, especially on windy days. Untarping on the landfill drastically decreases littering!

Stay safe out there, see you soon!

Step-riding reminder!

Helpers may not ride on steps of the truck while on GLRA grounds.

Helpers should never ride on the truck steps while in reverse nor while traveling between routes.
